2023/2024 Soybean Varieties

2023/2024 Corn Varieties

GENETICS OPTIMIZED

GROW **STRONG**

a new option for corn farmers

We know farmers are always looking for ways to increase their profit margins. That's why we're excited to introduce Go Corn — our new genetics optimized line to give your fields an edge up. Go Corn utilizes PowerCore® Enlist® technology to defend against pests and weeds, maximizing your yield. Give your crops the top-of-the-line support they need for robust and healthy growth and plant one of our new Go Corn varieties on your farm!

GoCorn GC11PC23

GENETICS OPTIMIZED

Excellent top-end yield potential when planted at medium populations in medium to high yield environments

- “The Money Maker” is the lead product in your lineup
- Industry-leading germplasm
- Very showy appearance all season
- Strong stalks and late season staygreen
- PowerCore® Enlist® option
- Very girthy ear with good flex

ARGONOMIC CHARACTERISTICS	
FLOWERING (GDU)	1390
BLACK LAYERS (GDU)	2572
PLANT HEIGHT	MEDIUM
EAR PLACEMENT	MEDIUM
EAR TYPE	FLEX
COB COLOR	PINK
DRYDOWN	MEDIUM
HUSK COVER	COMPLETE

ORGANIC	YES
GLYPHOSATE	N/A
ABOVE GROUND	PowerCore® Enlist®
ABOVE/BELOW GROUND	N/A

GoCorn GC14PC23

GENETICS OPTIMIZED

Excels as a high yielding full season food grade hybrid for the central and east

- Outstanding yield and food grade potential
- Excellent staygreen
- Good root strength
- Moves south well
- Long ear handles moderate population
- Great central and eastern hybrid

ARGONOMIC CHARACTERISTICS

FLOWERING (GDU)	1340
BLACK LAYERS (GDU)	2625

Position as full season hybrid across all soil types and populations

- Showy hybrid that delivers
- Girthy, cylindrical ear
- Excellent grain quality
- Excellent foliar health
- Performs east-to-west
- Well adapted for the mid-south

Apply Enlist® herbicides with confidence.

Review before spraying to ensure successful applications. For detailed instructions, visit [Enlist.com/Apply](https://www.enlist.com/Apply).

Always follow all label requirements.

BEFORE SPRAYING

1. Application Window

No later than R2 or full flowering stage.

2. Tank-Mix Partners

Check [EnlistTankMix.com](https://www.enlist.com/TankMix) for qualified tank-mix products.

3. Nozzles

Use only nozzles & pressure combinations listed on the product label.

4. Wind Speed, Weather

Target application at wind speeds greater than 3 mph, but less than 10 mph. Do not apply at wind speeds greater than 15 mph. Don't spray during a temperature inversion.

5. Susceptible Crops

Only spray when the wind is blowing away from susceptible crops listed on the product label, including tomatoes, fruiting vegetables, cucurbits, grapes, tobacco and cotton without the Enlist™ trait. Do not spray if the wind is blowing toward a susceptible crop.

6. Sensitive Area

Maintain a 30-foot downwind buffer (in the direction in which the wind is blowing) from any sensitive area (e.g., wooded areas, pastures, roadside ditches, lawns, tree plantations).

7. Sprayer Contamination

Make sure sprayer is clean from prior applications before using Enlist™ herbicides to avoid tank contamination.

APPLICATION

1. Spray Pressure

Verify spray pressure based on the product label and current conditions. Ground speed, product volume and nozzle selection all factor into the appropriate spray pressure.

2. Spray Rate

Enlist Duo® herbicide: 4.75 pt./A
Enlist One® herbicide: 2 pt./A

3. Spray Volume

Apply a spray volume of water ranging from 10 to 15 gal./A for best results.

4. Boom Height

Consult the nozzle manufacturer for optimum boom height (usually 24 inches or less above crop canopy).

5. Cleanout

After applying on Enlist™ herbicide, make sure to clean-water flush sprayer with 10% of tank volume and triple-rinse when application is complete.

ENLIST™ E3 SOYBEAN HERBICIDE TOLERANCES:

New 2,4-D Choline

Glyphosate

Glufosinate

GoSoy 2023/24 Enlist E3[®] Soybean Product Line

IDC- Iron Deficiency Chlorosis • SDS-Sudden Death Syndrome • FE-Frog Eye • RKN-Root Knot Nematode • SC-Stem Canker • STS-Sulfonylurea-tolerant
 Ratings are based on a 1-5 scale – 1 = Best 5 = Worst

Following burndown, Enlist Duo[®] and Enlist One[®] herbicides with Colex-D[®] technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use with Enlist E3[®] soybeans.

On-Target Application

- 90% less drift than traditional 2,4-D
- 99% less volatile than 2,4-D ester

2,4-D choline | Glyphosate | Glufosinate

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two modes of action work together to deliver control of yield-robbing weeds and help prevent resistance

THE NEXT GENERATION OF TECHNOLOGY

- Straight goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Durango[®] DMA[®] herbicide, Liberty[®] herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

TESTED TO BRING YOU MORE PROFIT PER ACRE

Don't worry, we tested it – and then tested it again. GoSoy offers superior varieties custom-designed to fit your location and goals.

Use our **Online Seed Finder** to choose the right trait, maturity and soil type for your operation; Or give your local seed rep a call and let them know it's time to **GoSoy**.

DONMARIO[®]

S E E D S

Farmers need products that prioritize their needs and set high benchmarks for high-yielding genetics, and DONMARIO[®] provides just that. We welcome you to get to know DONMARIO, where the main focus is breeding superior soybeans.

An independent soybean brand, DONMARIO is proud to partner with independent seed companies like Stratton Seed Company to provide fresh options in soybean seed genetics for American farmers. In fact, DONMARIO is one of the only independent seed companies in the U.S. with its own breeding program. The bottom line is that DONMARIO's exclusive genetics and choice of traits bring better soybeans to farmers.

DONMARIO began as a small family business in 1982 when two brothers, the Bartolomés, wanted better soybeans for their fields. DONMARIO grew quickly and soon earned the reputation for better soybean genetics and management practices.

Independent testing trials, countless third-party evaluations, and most importantly, DONMARIO soybeans' consistent performance on American farms continue to drive our success today.

DONMARIO[®] by the numbers: Numbers tell the story.

DONMARIO has proven success where soybeans matter most.

It is one of the most recognized names in South America, and its sister brands are a significant force in Europe. The genetic foundation behind DONMARIO is one of the most dominant in the main soybean growing areas of the world, accounting for more than 40% of global soybean production.

40+ YEARS

more than four decades of soybean innovation

The DONMARIO path to higher yielding soybeans:

1. Start with the best genetics.
2. Create the highest quality seed.
3. Protect yield with the most advanced traits.
4. Optimize production with intelligent agronomics.

Virtue Seeds is a non-GMO soybean brand that is taking an unconventional approach to the conventional soybean industry. Virtue's sole intent is to create an elite non-GMO germplasm to fuel elite non-GMO soybean products. This Pure Genetic Power approach is shaking up the market, bringing a unique opportunity to lower your input expense and increase your profit per bushel. As a dealer of Virtue non-GMO varieties, Stratton Seed Company is pleased to bring this option to our soybean growers.

Legal Information

Enlist E3® Soybeans

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.

Always read and follow herbicide label directions prior to use: Enlist® products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist® crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products.

Enlist Duo® and Enlist One® herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Always read and follow label directions. The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C.™ ® Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of Corteva Agriscience and its affiliated companies. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at the following webpage: www.corteva.us/Resources/trait-stewardship.html

DONMARIO® Soybeans

Varieties with the DuPont™ STS™ soybean technology are tolerant to certain SU (sulfonyleurea) herbicides. NOTE: A soybean variety with a herbicide tolerant trait does not confer tolerance to all herbicides. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions and precautions for use.

The GDM soybean products (including any conventional (non-GMO) soybean products) have been developed by GDM through decades of elite soybean breeding, with the sole intent to create elite Soybean germplasm and produce high-yielding. Bringing about these seed products has taken – and will continue to take – time, effort and investment to GDM and its suppliers. Such products are covered by intellectual property, including trademarks, pending plant variety certificates, confidential information, trade secrets, and pending patents. Grower shall not retain, hold back, clean, condition, sell (except as grain for feed or processing), transfer, or use any unused seed or its progeny (colloquially known as "saved seed" or "bin run") during any subsequent planting seasons beyond the planting season in which the applicable unit(s) of seed product(s) was acquired. In addition, research and breeding with the products and its progeny is strictly prohibited.

Growers must sign a GDM® SEEDS USE AGREEMENT for the purchase of any DONMARIO® soybean product. Even if some products do not contain biotech traits, the GDM® SEEDS USE AGREEMENT protects the intellectual property associated with non-biotech products such as germplasm and other intellectual know-how. Remember that the agreements you need to sign are dependent on what seed you purchased. For more information, visit www.AgCelerate.com or contact your seed dealer.

Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. These are general recommendations based on data taken from company trials and field observations and do not constitute a warranty of fitness or guarantee of performance for a particular use. Growers should evaluate data from multiple locations and years whenever possible.

DONMARIO® is a trademark used by B&B Seeds, LLC under license from GDM Seeds, Inc. 3414 Big Pine Trail, Champaign IL, 61822. Stratton Seed Company is a distributor of DONMARIO products for B&B Seeds, LLC.

VIRTUE™ Soybeans

The Virtue™ soybean products have been developed by GDM Seeds Inc. and its affiliates through decades of elite soybean breeding, with the sole intent to create elite Soybean germplasm and produce high-yielding. Bringing about these seed products has taken – and will continue to take – time, effort and investment to GDM and its suppliers. Such products are covered by intellectual property, including trademarks, pending plant variety certificates, confidential information, trade secrets, and pending patents (check lip of bag or attached tag for status of IP protection).

The purchase of these seeds includes a limited license to produce a single soybean crop in the United States (or other applicable country). This license does not extend to the use of seed of such crop or the progeny thereof for propagation or seed multiplication. Grower shall not retain, hold back, clean, condition, sell (except as grain for feed or processing), transfer, or use any unused seed or its progeny (colloquially known as "saved seed" or "bin run") during any subsequent planting seasons beyond the planting season in which the applicable unit(s) of seed product(s) was acquired. In addition, research and breeding with the products and its progeny, seed multiplication, and/or sale, offering for sale, exchange, delivery, transfer, import, or export of seed of the Virtue soybean varieties is strictly prohibited.

Growers must sign a GDM® SEEDS USE AGREEMENT for the purchase of any Virtue soybean product. Even if some products do not contain biotech traits, the GDM® SEEDS USE AGREEMENT protects the intellectual property associated with non-biotech products such as germplasm and other intellectual know-how. Remember that the agreements you need to sign are dependent on what seed you purchased. For more information, visit www.AgCelerate.com or contact your seed dealer.

XTENDFLEX® & ROUNDUP READY 2 XTEND®

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans or products with XtendFlex® Technology.

Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba. Products with XtendFlex® Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Glufosinate will kill crops that are not tolerant to glufosinate. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

Roundup Ready 2 Xtend®, Roundup Ready 2 Yield® and XtendFlex® are registered trademarks of Bayer Group. LibertyLink® and the Water Droplet Design® is a trademark of BASF Corporation.

POWERCORE® ENLIST® CORN

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS product launch stewardship guidance Corteva Agrisciences Product Launch Stewardship Policy. No crop or material produced from this product can be exported to, used, processed or sold across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. For further information about your crop or grain marketing options, contact DAS at 877-4-TRAITS (877-487-2487). Information regarding the regulatory and market status of agricultural biotechnology products can be found at: www.biotradestatus.com.

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein (www.corteva.us/Resources/trait-stewardship.html). To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience. In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Always read and follow herbicide label directions prior to use: Enlist® products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist™ crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products. Enlist corn contains genes that confer tolerance to 2,4-D and -fop herbicides. 2,4-D and -fop herbicides will damage or kill crops that are not tolerant to 2,4-D or -fops.

IRM - Properly managing trait technology is key to preserving it as a long-term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to [www.corteva.us/ Resources/trait-stewardship.html](http://www.corteva.us/Resources/trait-stewardship.html) to download the latest Corteva Agriscience Corn Product Use Guide.

Enlist Duo® and Enlist One® herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Always read and follow label directions. **PowerCore® multi-event technology developed by Corteva Agriscience and Monsanto. Roundup®, Roundup Ready®, Roundup Ready 2 Technology and Design, and PowerCore® are registered trademarks of Monsanto Technology LLC. Liberty Link® and the Water Droplet Design® are registered trademarks of BASF. Enlist®, Colex-D®, and Refuge Advanced® are trademarks of Corteva Agriscience and its affiliated companies. Excellence Through Stewardship is a registered trademark of Excellence Through Stewardship.**

PCE – PowerCore® Enlist® Refuge Advanced® corn products with HX1, VTP, ENL, LL, RR2. Contains a single-bag integrated refuge solution for above-ground insects. In EPA-designated cotton-growing counties, a 20% separate corn borer refuge must be planted with PowerCore Enlist Refuge Advanced products.
