Winter Pea		Austrian	Sept 1 – Nov 1		40-60**		Deer-Turkey

* This seeding rate is based on preinoculated seed coated with clay/lime. Use 2 (drill) or 3 (broadcast) of uncoated seed.

** Inoculate Seed With Proper Culture.

All of the above planting rates assume a complete stand for each species. If you plan to mix species, reduce planting rates (such as when broadcasting a 50/50 mixture of wheat and oats, use 60lbs of each for a total of 120lbs).

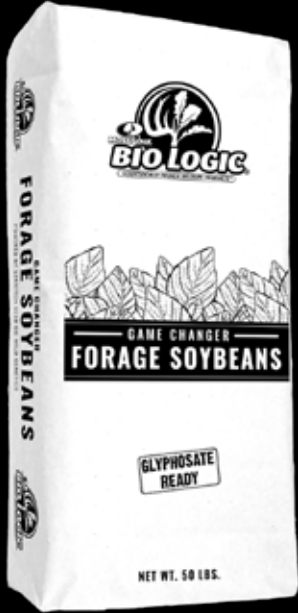

GAME CHANGER

FORAGE SOYBEANS

GAME CHANGER

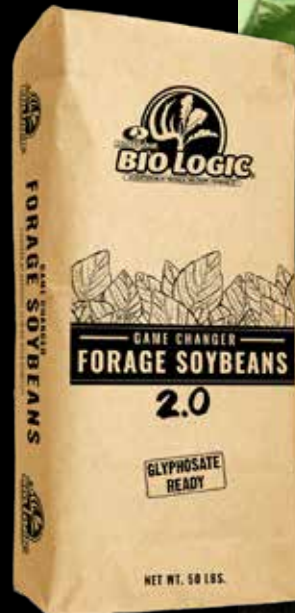

FORAGE SOYBEANS **2.0**

BioLogic Game Changer Forage Soybeans are glyphosate tolerant soybeans with good height, great stress tolerance, and an excellent disease package. High protein forage is ideal for providing nutrition for antler, body weight, and fawn growth. Game Changer soybeans are suitable for most all soil types and are also an indeterminate growth type. This bean keeps growing under adverse conditions ensuring a successful, clean plot with glyphosate-resistant weed control.

For a later maturing bean, try **BioLogic Game Changer 2.0**.

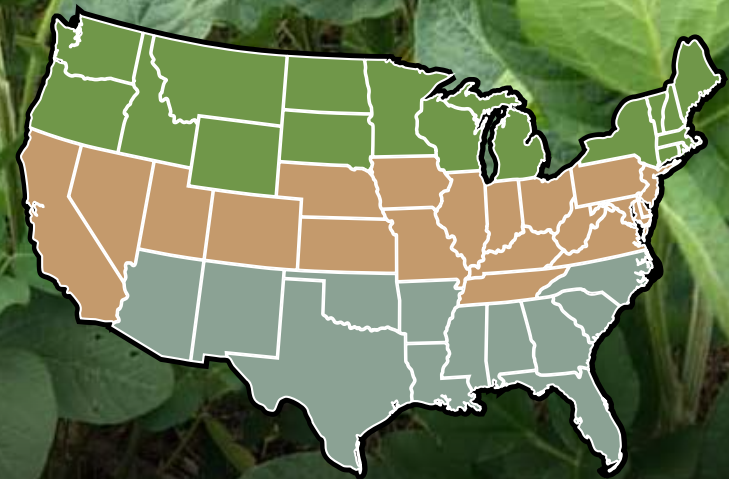

Similar to the original Game Changer, this forage bean offers substantial amounts of forage and pods to help manage your deer.

Offered in **50lb bags**

Planting Rate:

Drilled | 50lbs/acre
Broadcast | 80lbs/acre

Planting Dates:

■ May 15 - July 15

■ May 15 - July 15

■ May 15 - July 15

BONAFIDE

Bonafide is the ideal blend of Glyphosate Tolerant forage soybeans and Glyphosate Tolerant dwarf corn. This provides great opportunities not only for growth of your deer herd throughout the spring and summer but great attraction during the hunting months attracting both deer and waterfowl. Both of these components will help with weed control in your field all while producing quality forage and grain for all forms of wildlife. The ear placement from the corn will provide a desired height of food for wildlife such as deer and waterfowl.

Planting Rate: One bag per 1/2 acre

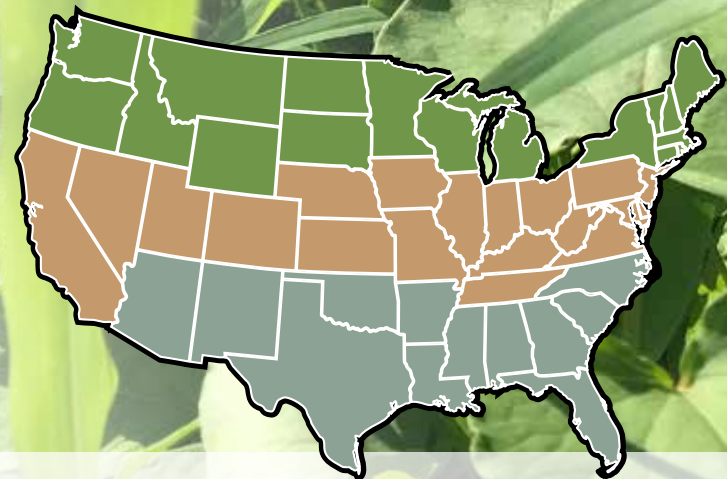

Offered in **25-28 lbs bags**

Dwarf Corn

Game Changer Soybeans

Planting Dates:

■ April 1 - June 15

■ April 1 - June 15

■ April 1 - June 15

The **Heritage** blend is designed to provide not only forage but cover to wildlife as well. This mix has great forage qualities along with structural benefits to help the forage grow to its greatest potential. Heritage has numerous species of seeds that will give the whitetail and other wildlife food during the summer months. This will allow you to have a healthier deer herd and give them the opportunity to grow to their greatest potential.

Call Stratton Seed Company and order Heritage to give the wildlife on your farm the nutrition they desire the most.

Offered in 41lb bags
Planting Rate: 41 lbs/acre

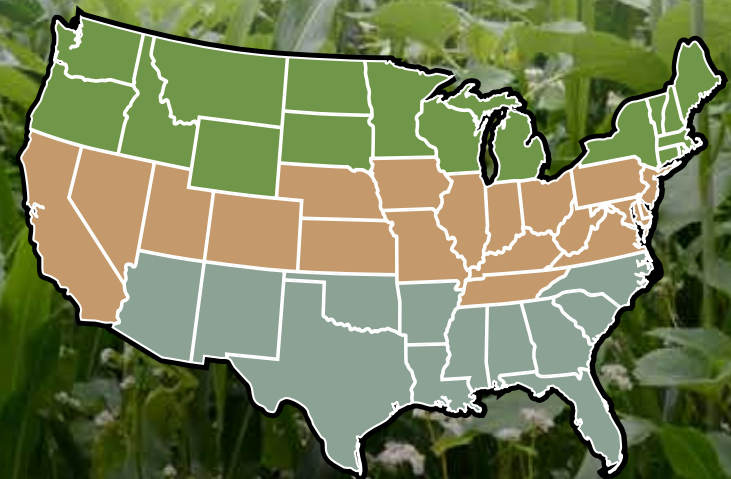

*Not available in Arkansas

Planting Dates:

■ May 15 - July 15

■ May 15 - July 15

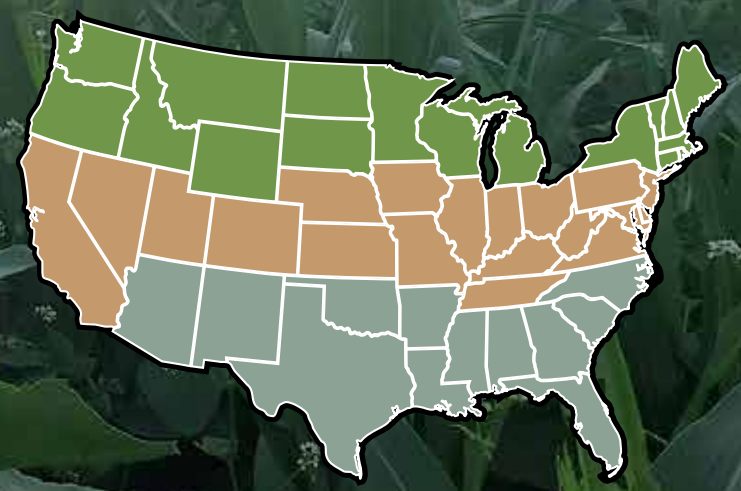

■ May 15 - July 15

Similar to Heritage, **Ancestry** is a blend designed to provide a great amount of forage and cover for whitetail through the spring and summer months. This blend provides a great screen as well as food throughout the growing season. It also offers great benefits for cattle grazing.

Offered in 41lb bags
Planting Rate: 41 lbs/acre

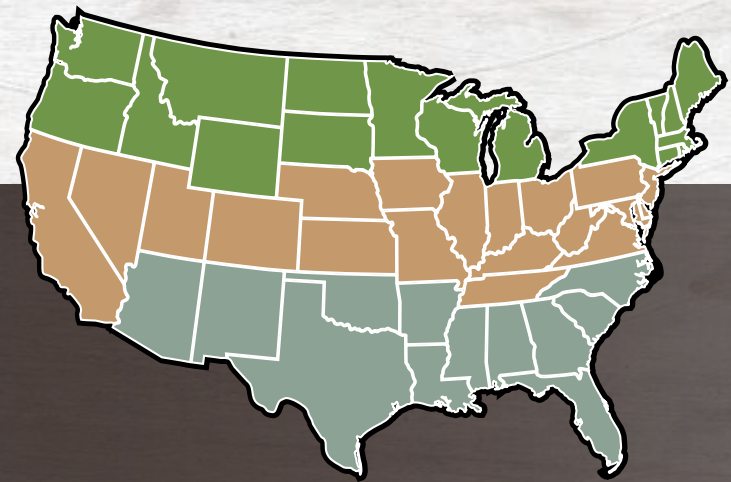

Planting Dates:
■ May 15 - July 15
 ■ May 15 - July 15
 ■ May 15 - July 15

Wild Wings

Wild Wings is an upland game bird mix designed to attract and hold birds for your benefit. It's packed full of seeds to attract those birds for hunting season and beyond. Wild Wings offers cover for upland birds and is a great mix to turn your hunting property around. Call Stratton Seed Company today to get a head start this season.

BOUNTY HUNTER

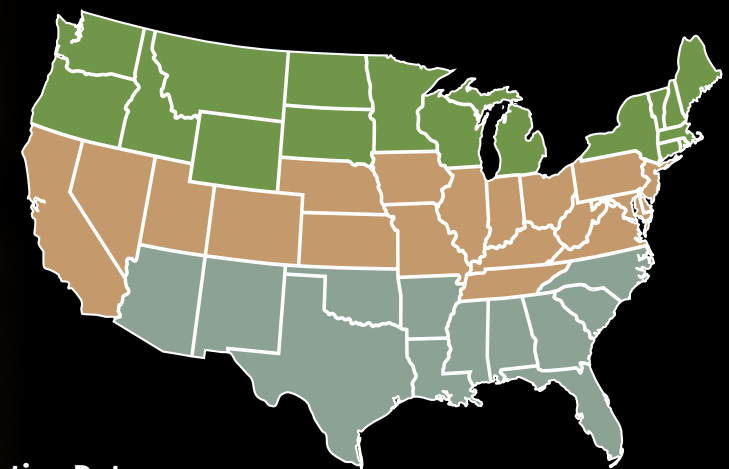

Stratton Seed's **Bounty Hunter** 6-way blend is a buffet of annual forage species designed to help get deer in close. Bounty Hunter is quick to germinate and it's cold tolerance helps give the whitetail the final push to get through the stress period of winter. Providing 6 of the top quality nutritional seeds that are most desired by deer from early fall whitetail hunts to spring time turkey hunts.

Available in 50 pound bags

Planting rate:

Drilled
Broadcast

1.5 bags/acre

Aug 15 - Sept 15

LEGACY

As deer managers, we strive to provide whitetail with a diverse selection of forage and high quality nutrition. Stratton Seed's **Legacy** premium annual blend is designed to help you do just that. With 11 different seed species, it helps your plot stay attractive to deer from early bow season all the way through the winter months, when quality forage is desired most. Quick germination and phenomenal nutrition is what the Legacy blend can provide for you.

REVIVAL

Stratton Seed's Revival is a perennial blend that's stacked with highly attractive forage that wildlife love. Providing forage every year to help your hunt end in a success. Once established, Revival will grow year in and year out for several years to provide quality forage. With crude protein levels up to 30%, give the whitetail the nutrition they need and desire most with Revival.

Available in ¼ acre and 1 acre bags — Planting rate: 4.25 lbs/quarter acre

Planting Dates:

July 15 - Aug 31

July 31 - Sept 1

Aug 15 - Sept 15

Big Buck Brassicas – or **Triple B** as we like to call it – is the perfect blend of old school and new school to keep your deer coming all winter long! This brassica mix can be planted in spring, summer or early fall and has a quick establishment date to start providing your herd with the nutrition they need in the fall and winter months. Winfred can provide an excellent source of energy and protein (approximately 22%) while also being highly palatable and digestible with its high leaf ratio. Pacer was bred for fast, vigorous establishment and quick maturity. It also has more leaf structure than most other forage turnips and is multi-crowned for improved re-growth potential even after aggressive animal foraging. This blend also offers Sugar Beets and Purple Top Turnips which are a long time standard in the food plot world.

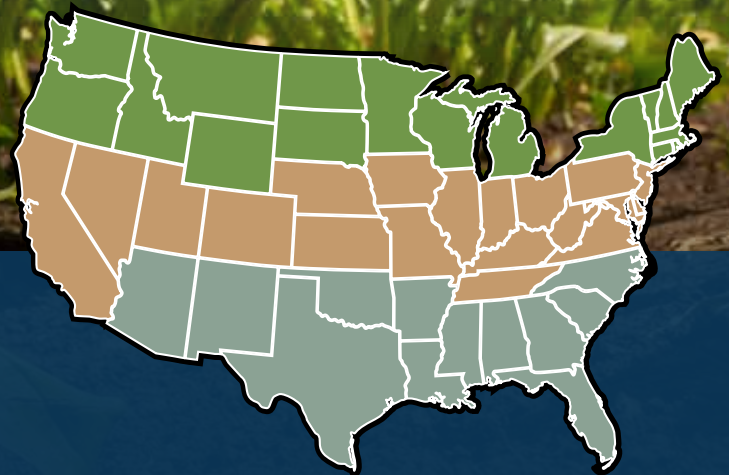

Available in 4 lb bags
Planting Rate: 2 bags/1 acres

Planting Dates:

July 1 - Aug 31

Aug 1 - Sept 30

Sept 1 - Oct 31
