

GO WILD
STRATTON SEED

Stratton Seed Company's wildlife seed was designed to help hunters reach their goals of growing successful food plots for wildlife. Our annual and perennial specialty blends are designed to help those hunts end in a success. Whether you enjoy harvesting a hit list buck in a soybean field, shooting ducks over a flooded field, or harvesting a tom on a clover plot, we have you covered.

We strive to provide you with diverse, high quality forage that will help you be successful in the field and help grow whitetail to their maximum potential. Whatever the situation may be, give Stratton Seed Company a call to help reach your goals.

GROW BETTER FORAGE.

Wild GAME CHANGER GT SOYBEANS

The **Wild Game Changer GT** glyphosate tolerant game plot soybeans. This selection has good height, as well as stress tolerance, and an excellent disease package. The **Wild Game Changer** is suitable for all soil types and is also an indeterminate growth type. This bean keeps growing under adverse conditions insuring a successful, clean plot with glyphosate resistant weed control.

Cattlemen's Treasure

COVER CROP BLEND

Cover crops are a good way to provide high-quality forage for your herd while improving soil health! Cattlemen's Treasure is made up of five different species. Each plant is included with a distinct purpose. This blend provides a large quantity of forage through the fall and winter months to maximize gains during a critical time of year. The mix of cool-season annual grasses, broad leaves, and legumes converts idle agricultural fields into a winter grazing pasture while increasing the soil's fertility.

Available in 52 pound bags
Planting rate: 50 lbs/acre

Stratton Seed Company
