Soybean Varieties

Stratton Seed Company

1948

On February 2, 1948 Leland Stratton was asked by a good customer, Nelson Rogers, to form a partnership and purchase Albert Steel's seed business located at 320 North Main in Stuttgart, AR. The plant consisted of one small seed cleaner in an old wooden rice mill.

1999

The highway 79 plant in Stuttgart, AR is by far the largest and newest of Stratton Seed's facilities. It is the largest soybean and wheat seed conditioning plant in the Southern United States. The plant has the capacity to store approximately 1.5 million bulk bushels.

It's now easier than ever to find the Stratton Seed products you love!

Try our new dealer map feature on our website to find the product you're looking for at the **closest dealer to you!**

1989

In 1989, Stratton Seed purchased the seed operation of Winrock Farms in Carlisle, AR and added additional processing and 400,000 bushel bulk storage. Additional warehouse space has been added since the purchase.

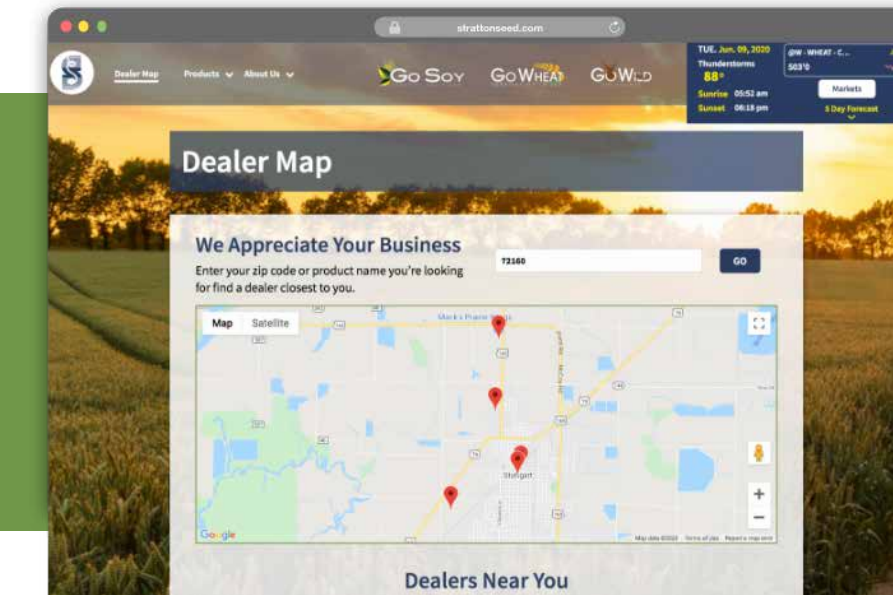

1992

Stratton Seed purchased the assets of a competitor, Bogard Seed Company, and added over 800,000-bushel bulk capacity in Stuttgart, AR.

2018

In 2018 Stratton made its most recent purchase of Gemeinhardt Seed in Anniston, Missouri, further increasing their production and sales footprint in the south.

Stratton Seed Company

www.StrattonSeed.com

Apply Enlist® herbicides with confidence.

Review before spraying to ensure successful applications. For detailed instructions, visit Enlist.com/Apply. Always follow all label requirements.

BEFORE SPRAYING

- **1. Application Window**
No later than R2 or full flowering stage.
- **2. Tank-Mix Partners**
Check EnlistTankMix.com for qualified tank-mix products.
- **3. Nozzles**
Use only nozzles & pressure combinations listed on the product label.
- **4. Wind Speed, Weather**
Target application at wind speeds greater than 3 mph, but less than 10 mph. Do not apply at wind speeds greater than 15 mph. Don't spray during a temperature inversion.
- **5. Susceptible Crops**
Only spray when the wind is blowing away from susceptible crops listed on the product label, including tomatoes, fruiting vegetables, cucurbits, grapes, tobacco and cotton without the Enlist™ trait. Do not spray if the wind is blowing toward a susceptible crop.
- **6. Sensitive Area**
Maintain a 30-foot downwind buffer (in the direction in which the wind is blowing) from any sensitive area (e.g., wooded areas, pastures, roadside ditches, lawns, tree plantations).
- **7. Sprayer Contamination**
Make sure sprayer is clean from prior applications before using Enlist™ herbicides to avoid tank contamination.

APPLICATION

- **1. Spray Pressure**
Verify spray pressure based on the product label and current conditions. Ground speed, product volume and nozzle selection all factor into the appropriate spray pressure.
- **2. Spray Rate**
Enlist Duo® herbicide: 4.75 pt./A
Enlist One® herbicide: 2 pt./A
- **3. Spray Volume**
Apply a spray volume of water ranging from 10 to 15 gal./A for best results.
- **4. Boom Height**
Consult the nozzle manufacturer for optimum boom height (usually 24 inches or less above crop canopy).
- **5. Cleanout**
After applying on Enlist™ herbicide, make sure to clean-water flush sprayer with 10% of tank volume and triple-rinse when application is complete.

ENLIST™ E3 SOYBEAN HERBICIDE TOLERANCES:

New 2,4-D Choline
Glyphosate
Glufosinate

Find your area rep. listed on page 11-12 to place an order today!

Farmers need products that prioritize their needs and set high benchmarks for high-yielding genetics, and Stratton Seed Company is excited to introduce DONMARIO: a brand that provides fresh options in soybean seed genetics for American farmers! DONMARIO’s innovations in exclusive genetics and tailored seed traits demonstrate a robust opportunity to partner with Stratton Seed Company and bring better soybeans to farmers.

Since launching as a small family business in 1982, DONMARIO grew quickly and earned its reputation as a brand that seeks better soybean genetics and management practices for farmers. Independent testing trials, countless third-party evaluations, and most importantly; farmer’s consistent success with DONMARIO’s soybeans continue to drive DONMARIO’s success today.

DONMARIO is a high-yielding soybean genetics authority with significant market share in six countries world-wide and is a leading brand in five of the seven largest soybean producing countries in the Americas, selling over 16,000 units across 16 million acres each year. In 2006, DONMARIO began testing varieties in America and established their U.S. soybean breeding program in 2007. Today, DONMARIO varieties are tested at 140 dedicated U.S. research sites, with over 425,000 yield test plots across the U.S. Furthermore, they have 65 unique product placement strip trial locations where DONMARIO varieties are tested in different environments, row spacing, population, and planting dates, with the objective to give the best product recommendations for every field. Data from the past thirteen years of U.S. testing gives us confidence that DONMARIO genetics will perform exceptionally well for each localized region.

With over 36 years in the soybean industry, DONMARIO is serious about soybeans. We believe farmers will love all the qualities and options DONMARIO brings: exclusive genetics, top-notch soybeans, and a determination to continue bringing ever-better soybeans to American farmers!

No dicamba may be used in-crop with seed in the Roundup Ready® Xtend Crop System unless and until approved or specifically permitted by the U.S. EPA and the appropriate state agency for such use. As of July 20, 2020, no dicamba formulations are currently registered by the U.S. EPA for in-crop use with seed in the Roundup Ready® Xtend Crop System in the 2021 season.*

* No dicamba may be used in-crop with seed in the Roundup Ready® Xtend Crop System, unless and until approved or specifically permitted by the U.S. EPA and the appropriate state agency for such use. As of July 20, 2020, no dicamba formulations are currently registered by the U.S. EPA for in-crop use with seed in the Roundup Ready® Xtend Crop System in the 2021 season. Current stocks of low-volatility dicamba herbicides XtendiMax® herbicide, Engenia® herbicide and Fexapan® herbicide previously approved for in-crop use with seed in the Roundup Ready® Xtend Crop System may not be used after July 31, 2020. Dicamba may harm crops that are not tolerant to dicamba. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicides products for in-crop use with seed in the Roundup Ready® Xtend Crop System.

NOTICE: DO NOT APPLY ANY HERBICIDE TO SEED IN THE ROUNDUP READY® XTEND CROP SYSTEM UNLESS IT HAS A PRODUCT LABEL SPECIFICALLY AUTHORIZING THAT USE. TO USE A HERBICIDE IN ANY MANNER INCONSISTENT WITH ITS LABELING IS A VIOLATION OF FEDERAL LAW. REFER TO THE BAYER TECHNOLOGY USE GUIDE FOR DETAILS AND RECOMMENDATIONS ON USING APPROVED ROUNDUP® AND LIBERTY® BRANDED HERBICIDES ON SEED IN THE ROUNDUP READY® XTEND CROP SYSTEM.

With a focus on decreasing input costs and maximizing profitability, Virtue Seeds offers premier non-GMO soybean germplasm. The Virtue brand was developed to take soybean breeding to its highest potential rather than stack traits onto a variety. Virtue genetics are developed to withstand stress and disease and are tested in diverse and difficult environments. After this rigorous process, only the highest yielding varieties are marketed to producers. As a dealer of Virtue non-GMO varieties, Stratton Seed is pleased to bring this option to our soybean growers.

Enlist E3® Soybeans

Dow AgroSciences is a member of Excellence Through Stewardship® (ETS). Dow AgroSciences products are commercialized in accordance with ETS product launch stewardship guidance and Dow AgroSciences Product Launch Stewardship Policy. No crop or material produced from this product can be exported to, used, processed or sold across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. For further information about your crop or grain marketing options, contact DAS at 877-4-Traits (877-487-2487). Information regarding the regulatory and market status of agricultural biotechnology products can be found at: www.biotradestatus.com.

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein (www.corteva.us/Resources/trait-stewardship.html). To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed. Always read and follow herbicide label directions prior to use: Enlist® products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist® crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products.

The transgenic soybeans event in Enlist E3® soybeans is jointly developed and owned by Dow AgroSciences LLC and M.S. Technologies, L.L.C. ®™ Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of The Dow Chemical Company ("Dow") or an affiliated company of Dow. Excellence Through Stewardship is a registered trademark of Excellence Through Stewardship.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Dow AgroSciences technologies can be found at the following webpage: www.corteva.us/Resources/trait-stewardship.html

DONMARIO™ Soybeans

Varieties with the DuPont™ STS™ soybean technology are tolerant to certain SU (sulfonyleurea) herbicides. NOTE: A soybean variety with a herbicide tolerant trait does not confer tolerance to all herbicides. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions and precautions for use.

The GDM soybean products (including any conventional (non-GMO) soybean products) have been developed by GDM through decades of elite soybean breeding, with the sole intent to create elite Soybean germplasm and produce high-yielding. Bringing about these seed products has taken – and will continue to take – time, effort and investment to GDM and its suppliers. Such products are covered by intellectual property, including trademarks, pending plant variety certificates, confidential information, trade secrets, and pending patents. Grower shall not retain, hold back, clean, condition, sell (except as grain for feed or processing), transfer, or use any unused seed or its progeny (colloquially known as “saved seed” or “bin run”) during any subsequent planting seasons beyond the planting season in which the applicable unit(s) of seed product(s) was acquired. In addition, research and breeding with the products and its progeny is strictly prohibited.

Growers must sign a GDM™ SEEDS USE AGREEMENT for the purchase of any DONMARIO soybean product. Even if some products do not contain biotech traits, the GDM™ SEEDS USE AGREEMENT protects the intellectual property associated with non-biotech products such as germplasm and other intellectual know-how. Remember that the agreements you need to sign are dependent on what seed you purchased. For more information, visit [www. AgCelerate.com](http://www.AgCelerate.com) or contact your seed dealer.

Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. These are general recommendations based on data taken from company trials and field observations and do not constitute a warranty of fitness or guarantee of performance for a particular use. Growers should evaluate data from multiple locations and years whenever possible.

DONMARIO™ is a trademark used by B&B Seeds, LLC under license from GDM Seeds, Inc. 454 E 300N Rd, Gibson City, IL 60936. Stratton is a distributor of DONMARIO products for B&B Seeds, LLC.

VIRTUE™ Soybeans

The Virtue™ soybean products have been developed by GDM Seeds Inc. and its affiliates through decades of elite soybean breeding, with the sole intent to create elite Soybean germplasm and produce high-yielding. Bringing about these seed products has taken – and will continue to take – time, effort and investment to GDM and its suppliers. Such products are covered by intellectual property, including trademarks, pending plant variety certificates, confidential information, trade secrets, and pending patents (check lip of bag or attached tag for status of IP protection).

The purchase of these seeds includes a limited license to produce a single soybean crop in the United States (or other applicable country). This license does not extend to the use of seed of such crop or the progeny thereof for propagation or seed multiplication. Grower shall not retain, hold back, clean, condition, sell (except as grain for feed or processing), transfer, or use any unused seed or its progeny (colloquially known as “saved seed” or “bin run”) during any subsequent planting seasons beyond the planting season in which the applicable unit(s) of seed product(s) was acquired. In addition, research and breeding with the products and its progeny, seed multiplication, and/or sale, offering for sale, exchange, delivery, transfer, import, or export of seed of the Virtue soybean varieties is strictly prohibited.

Growers must sign a GDM™ SEEDS USE AGREEMENT for the purchase of any Virtue soybean product. Even if some products do not contain biotech traits, the GDM™ SEEDS USE AGREEMENT protects the intellectual property associated with non-biotech products such as germplasm and other intellectual know-how. Remember that the agreements you need to sign are dependent on what seed you purchased. For more information, visit [www. AgCelerate.com](http://www.AgCelerate.com) or contact your seed dealer.

Varieties with the DuPont™ STS™ soybean technology are tolerant to certain SU (sulfonyleurea) herbicides. XTENDFLEX® & ROUNDUP READY 2 XTEND®

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto’s Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

XtendFlex® soybeans have received full approval for planting in the United States but are pending approval in certain export markets. For 2020, XtendFlex® soybeans will be available as part of a stewarded introduction only to growers who have signed a 2020 XtendFlex® Stewardship Agreement and agree to follow the stewardship requirements. Commercial availability in 2021 is dependent upon regulatory approval.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans or products with XtendFlex® Technology.

Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba. Products with XtendFlex® Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Glufosinate will kill crops that are not tolerant to glufosinate. Contact your seed brand dealer or refer to the Monsanto Technology Use Guide for recommended weed control programs.

Roundup Ready 2 Xtend® and XtendFlex® are registered trademarks of Bayer Group.
