

GO WILD
STRATTON SEED

2020-21 Wildlife Blends

GROW BETTER FORAGE.

Stratton Seed Company's wildlife seed was designed to help hunters reach their goals of growing successful food plots for wildlife. Our annual and perennial specialty blends are designed to help those hunts end in a success. Whether you enjoy harvesting a hit list buck in a soybean field, shooting ducks over a flooded field, or harvesting a tom on a clover plot, we have you covered.

We strive to provide you with diverse, high quality forage that will help you be successful in the field and help grow whitetail to their maximum potential. Whatever the situation may be, give Stratton Seed Company a call to help reach your goals.

BioLogic Game Changer Forage Soybeans are glyphosate tolerant soybeans with good height, great stress tolerance, and an excellent disease package. High protein forage is ideal for providing nutrition for antler, body weight, and fawn growth. Game Changer soybeans are suitable for most all soil types and are also an indeterminate growth type. This bean keeps growing under adverse conditions ensuring a successful, clean plot with glyphosate-resistant weed control.

For a later maturing bean, try **BioLogic Game Changer 2.0**. Similar to the original Game Changer, this forage bean offers substantial amounts of forage and pods to help manage your deer.

Offered in **50lb bags**

The **Heritage** blend is designed to provide not only forage but cover to wildlife as well. This mix has great forage qualities along with structural benefits to help the forage grow to its greatest potential. Heritage has numerous species of seeds that will give the whitetail and other wildlife food during the summer months. This will allow you to have a healthier deer herd and give them the opportunity to grow to their greatest potential.

Call Stratton Seed Company and order Heritage to give the wildlife on your farm the nutrition they desire the most.

Cattleman's Treasure

COVER CROP BLEND

Cover crops are a good way to provide high-quality forage for your herd while improving soil health! Cattleman's Treasure is made up of five different species. Each plant is included with a distinct purpose. This blend provides a large quantity of forage through the fall and winter months to maximize gains during a critical time of year. The mix of cool-season annual grasses, broad leaves, and legumes converts idle agricultural fields into a winter grazing pasture while increasing the soil's fertility.
